# PhoneBAK

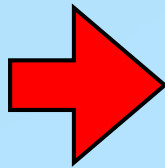

Anti-theft software works covertly in mobile phone devices (Symbian OS, Sony Ericsson, PDA phone, Blackberry) by automatically checking if the SIM card is user authorised. If this is not the case, PhoneBAK sends the thief's telephone number, location and other details to user nominated contacts. This information is usually enough to help get the device back. PhoneBAK can also delete user data on the stolen device.

## Features

Thief's contact number

·  
IMEI

·  
IMSI

·  
Customised Alert

·  
Location  
(Area Code & Cell ID)

·  
IP Address

·  
Nearby wireless network IP  
Addresses

PhoneBAK Mobile phone is an innovative lost & found anti-theft software program that sends the thief's contact number to a pre-defined mobile phone number when your mobile phone is stolen!

Install the software program into your device and the program works covertly in the device by automatically checking on the Subscriber Identity Module (SIM) card, all without the knowledge of the unauthorised user!

It will send out two SMS texts (local and/or overseas) using the thief's SIM card to your pre-defined mobile phone numbers. The SMS will include a customisable message, IMEI, IMSI, Area Code and Cell Id and new mobile telephone number .

No subscriptions or annual fees.

[info.exacttrak.com](http://info.exacttrak.com)

## Operating System

Symbian.

## SMS Notification

Install the software program into the mobile phone and the program works quietly checking for any unauthorized SIM card.

If detected, 02 SMS will be sent out to the pre-defined (local and/or overseas) mobile phone numbers (e.g. spouse, colleague, I.T. dept).

SMS will contain the thief own mobile phone number, IMEI (International Mobile Equipment Identity), IMSI\* (International Mobile Subscriber Identity) and GSM Cell ID\* (GSM Localization).

Owner can contact the thief directly to retrieve back the stolen mobile phone or provide the location information to the Police..

\*Subject to changes according to countries' network, service providers and model of phones.

### **Customisable Message**

Owner can personalise the SMS message to be sent to the pre-defined numbers.

### **Auto Start Up**

PhoneBAK mobilephone auto runs every time the mobile phone is powered up.

### **Supported Languages**

English, Chinese, French, German, Spanish and Russian.

### **Low Memory Resource**

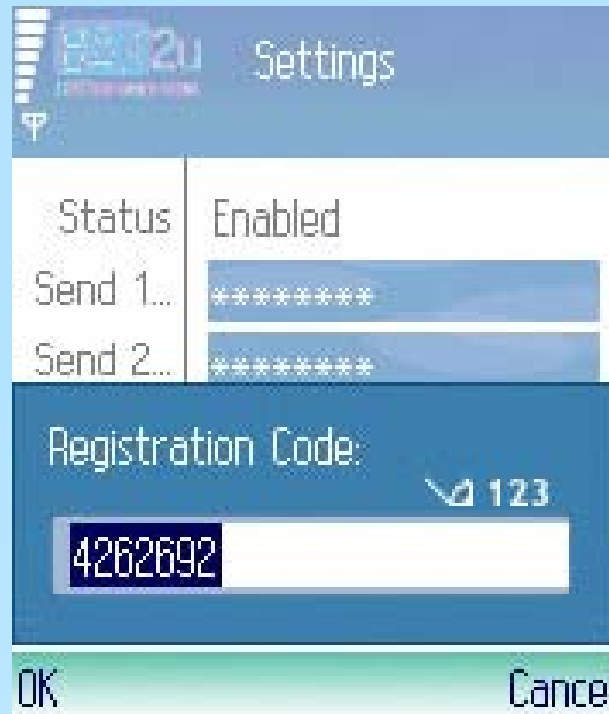

During the day-to-day usage of the phone with an authorized SIM, PhoneBAK mobile phone will not use any memory resource, and **does not run in the background.**

PhoneBAK will only run once when the mobile phone starts up and will turn off once the SIM card is authorised.

## Multi SIM Cards

- Up to 10 SIM cards can be supported.
- Password protection to ensure no unauthorised access to programme.

## Frequently Asked Questions

### **i. How do I know if PhoneBAK (PDA Phones & Mobile phones) works?**

When the SIM card is changed for one that has not been authorised, PhoneBAK will silently send a SMS to the pre-defined mobile phone number. This can be tested during installation

It is important to test out the pre-defined local number by simply interchanging with another SIM card first before actual use.

### **ii. How do I install the software?**

There is a step-by-step installation guide included with the package.

### **iii. Is there any technical or local support?**

PhoneBAK is supported worldwide via email and in various countries through our partners. For a full list of partners please email [support@exactTrak.com](mailto:support@exactTrak.com)

### **iv. Can I use the same program for any other devices?**

Each copy of PhoneBAK program is licensed to only a single registered device. It is non-transferable.

### **v. Who will recover the lost device?**

If you have reported the loss of your mobile phone to the Police, you should provide them with all the tracking information that PhoneBAK will send to your nominated receiver.

# Supported Nokia phones

Can't see your phone. Email us your model and we will check
